As part of a team, you will implement robust secure coding practices and help strengthen the security of an existing application supporting thousands of customers in the financial field.

Responsibilities

- Implement application storyboards and use cases into functional applications
- Design, build, and maintain efficient, reusable, and reliable applications
- Ensure the best possible performance, and responsiveness of the applications
- Help to maintain code quality and stability
- Maintain code organization and automatization
- Accounting for software security considerations and analysis
- Analyzing the code base and assessing risks from a security perspective
- Writing clean, fast to a high standard
- Remediating security vulnerabilities in the code base and implementing best practices
- Bringing security considerations and requirements to software implementation

Required Skills

- Student in Software Engineering or a related discipline (computer science etc.)
- Fourth year student or student who is strong commitment with software development
- Strong commitment in Software Development
- Good understanding in JavaScript
- Hands-on experience or training on Software Security
- Excellent written and verbal professional English
- Excellent communication and reporting skills
- Critical thinking with attention to detail when assessing severity and impact of security issues
- Quick learning and ability to adapt to different environments

Preferred Skills

- Familiar with Atlassian JIRA and related process
- Familiar with SVN or other versioning systems
- Experience in code optimization
- Understanding of OWASP best practices and static code analysis
- Familiar with open source and commercial security testing tools

Compensation & Benefits

- Maximum 3 months period. Salary offered is as allowance during this period. If internship performance is good, he/she can be a full time developer after the period.
- Employee Benefits: NSSF, and other benefits
