

INTERNSHIP Web Software Developer

Salary: Negotiable | Location: Cambodia

About Slash

Slash is a Build Studio. We build remote, autonomous teams to help innovators develop software, products and hi-tech startups. We also build and invest in our own startups and commercialize them through joint ventures in ASEAN and Europe.

Slash has headquarters in Singapore and community-oriented R&D hubs in Phnom Penh and Bali.

Role and responsibilities, and how will the role impact Slash?

Slash is looking for a dynamic Developer to build web apps for sophisticated enterprise-grade systems and fast-growing funded startups. Depending on your technical skills and experience, you will join one of our Agile Software Delivery teams.

You will be a an active contributor to the company:

- Applying your skills in frontend and/or backend development stacks following best coding practices, Agile processes and standards throughout the company.
- Supporting tech lead, scrum masters, and development teams with delivering enterprise-grade systems to clients.
- We will rely on your technical skills and ingenuity to stay up to date on the latest in frontend and backend development stacks.

How do you know if you are a good fit?

- Expertise in at least one programming language (ex: PHP, JS, Java...) and one framework, with a preference to JS frameworks (ex: ReactJS, VueJS, Express NodeJS...)

- Keen interest in learning about different technologies (such as ReactJS, NextJS, ExpressJS, GraphQL, RESTful, MongoDB, Serverless, etc)
- Tech-savvy (up to date with latest trends)
- Positive attitude, independent, inner drive to become successful
- Good verbal and written communication skills in English.
- Proactive, confident, doesn't shy away from responsibility, take full ownership
- Exceptional analytical, debugging/ troubleshooting, coding skills, problem solving
- Interest to work on multiple global corporate and startup projects, across different industries in an agency.
- Ability to coordinate and communicate with diverse teams and individuals (e.g solution architects, product managers, scrum masters, developers)
- Experience of automated testing frameworks, is a plus
- Knowledge of CI/CD, Docker, AWS, Cloud Computing is a plus
- Ability to understand different business models and applications is a bonus
- Proficient with broad software development and agile concepts is a bonus!
- Degree or training in computer science

Why join us?

- **Projects/clients:** Get the stability of a larger group and the excitement of a startup. Work on interesting global projects, challenges and technologies for top brands, fast-paced startups and governments.
- **Teams:** Join our builders family and grow professionally in our learning communities packed with smart peers, regular speakers and events so you don't miss out on the latest tech and trends.
- **Work environment:** Get the top talent treatment in our Silicon Valley-style work environment. Benefit from a premium work environment, with common areas for socializing, private spaces, stocked kitchens and our flexible-hours, a freedom-centric culture where we take work-life balance seriously.
- **Technology:** We work on a wide-range of technologies: latest web and mobile technologies, AI, blockchain, latest Cloud services, microservices & middlewares, security & infrastructure, etc

How do you apply?
