Now, we are looking proficient **SYSTEM & NETWORK ADMINISTRATORS** to join our teams and to work in our office in Phnom Penh, connecting daily with our international partners and customers from Europe, Asia and USA, in a challenging and high technology environment, and in a smiling professional atmosphere.

### **DUTIES**

- Fully support, configure, maintain and upgrade corporate customer's networks and in-house servers.
- Install and integrate new server hardware and applications.
- Keep an eye out for needed updates.
- Support and administer third-party applications.
- Ensure network security and connectivity.
- Monitor network performance (availability, utilization, throughput, goodput, and latency) and test for weaknesses.
- Resolve problems reported by end user.
- Define network policies and procedures.
- Specify system requirements and design solutions.
- Research and make recommendations on server system administration.
- Work with IT support personnel and provide network administration and support.

### **ESSENTIAL REQUIREMENTS**

- Have at least a Bachelor degree in Design or equivalent.
- Have at least three years' professional experience in System & Network Administration.
- Have excellent knowledge in management, control, and monitoring of server infrastructure, networking, routing and switching.
- Have experience with firewalls, Internet VPN's remote implementation, troubleshooting, and problem resolution is desired.
- Have ability to set up and configure server hardware.
- Have experience with backup and recovery software and methodologies.
- Is highly proficient in spoken and written English (French speaking is a valuable asset).
- Have strong communication skills.
- Be great at organizing, prioritizing and multitasking.
- Be able to work independently and handle projects pressure.
- Strong commitment toward challenging in a startup company.
- Love new technologies and R&D.
